

PROJECT TYPE
New Construction

BUILDING AREA
22,000 Sq. Ft.

CONSTRUCTION COST
\$3.5 Million

CONSTRUCTION DATES
December 2012 - September 2013

GENERAL CONTRACTOR
Embree Group

SERVICES
Pre-Design
Feasibility
Schematic Design
Design Development
Construction Documents
Construction Observation

McCoy's Building Supply

Floresville, Texas

McCoy's Building Supply operates over 80 stores throughout Texas, New Mexico, Oklahoma, Arkansas, and Mississippi. They hired Acuform to develop a new prototype plan as they enter new growing markets. We worked with the client to review each aspect of their operation and re-consider each element of their buildings to satisfy their needs and offer superior energy performance to their older facilities. Our prototype design for this 22,000 sq. ft. building incorporates several new materials and includes a new, more inviting entry.

“After a careful needs evaluation with key decision makers, we developed a more efficient and adaptable prototype design for this regional home improvement center.”

Our prototype design services included existing facility analysis, schematic design, design development, and documentation services. Acuform has subsequently been engaged to perform documentation, bidding, and construction observation services on two new facilities in Taylor and Floresville, Texas.
