Equipment Coordination

PROJECT DESCRIPTION

Acres North Animal Clinic has an established location in San Antonio, however they sought a new space with a new, more progressive image to better attract new clients as well as top professionals to San Antonio's north central area.

We worked with their team to develop plans for a premier veterinary clinic. The space plan was efficiently laid out to accommodate all program requirements and specialized equipment. The new facility will feature a large customer waiting area, eight private exam rooms, two private surgery rooms, an open treatment facility and a dedicated dental room area.

This will be a flagship location for our team. We look forward to a clean and professional facility in which we can grow for years to come.
