

ADVANCED SMILE CARE

Shavano Park, Texas

PROJECT INFORMATION

PROJECT TYPE

Commercial

EFFECTIVE AREA

10,400 Sq. Ft.

CONSTRUCTION COST

\$2 Million

COMPLETION DATE

September, 2014

OWNER

Advanced Smile Care

ARCHITECT OF RECORD

Acuform Architecture

GENERAL CONTRACTOR

Malitz Construction

EXPERTISE

Site Planning & Design

Building Design

Regulatory Approvals

Equipment Coordination

PROJECT DESCRIPTION

Acuform was selected by an independent project manager for this facility due to our understanding of dental offices and our ability to develop cost effective custom design solutions. Acuform developed plans for a 10,400 sq. ft. medical office building.

Our task was to maximize the selected site with a building that was both distinctive and cost effective. Tight site with limited vehicular access limited the options for site layout and drove the building location and general footprint. Working with several owner representatives, we were able to work toward one cohesive design solution which met the client's goals of a distinctive building style, cost effective construction and efficient interior spaces.

“The client was very happy with a building that met their needs and a high quality of design services was absolutely a key component of that success.

- Bill Ellis, Project Manager ”
