February, 2025

### OWNER

Belden's Automotive

### ARCHITECT OF RECORD

Acuform Architecture

### GENERAL CONTRACTOR

The Struthoff Company

### EXPERTISE

Site Planning & Design

Building Design

Interior Design

Equipment Coordination

## PROJECT DESCRIPTION

As consumers hold onto vehicles beyond the manufacturer's warranty periods, Belden's Automotive has experienced tremendous growth. Belden's has worked with other architects in the past for new facilities, but they have all proven to be very expensive to build and difficult to maintain. Acuform was selected to come up with a more efficient and adaptable solution for one location in far west San Antonio and potentially future locations.

We worked with the Owner to develop a tight and efficient shop and front-of-house layout all within a basic pre-engineered metal building shell. We employed a customer drop-off canopy and upgraded finishes in the customer areas to improve the customer experience.

“Acuform and your team did a great job on this project and we will certainly use you guys for the next project.

- Rusty Belden, Owner

”
