EFFECTIVE AREA

7,000 Sq. Ft.

CONSTRUCTION COSTS

\$3.5 Million

COMPLETION DATE

Concept

OWNER

Kahlig Auto Group

ARCHITECT OF RECORD

Acuform Architecture

EXPERTISE

Needs Assessment
Site Planning & Design
Building Design
Interior Design
Extensive Code Analysis

PROJECT DESCRIPTION

Acuform has been a trusted design partner for the Kahlig Automotive Group since 2013, providing a wide range of architectural and engineering services. Most recently, we have been engaged to design a new Lincoln Vitrine facility to serve the growing New Braunfels market.

This new facility focuses on key customer-facing functions and includes a showroom, sales offices, customer lounge areas, and a dedicated vehicle service drop-off. Acuform collaborated closely with the OEM to implement the Lincoln Vitrine image program, carefully navigating the evolving design standards while tailoring the layout to meet the dealership's specific needs.

“Your team has been on point with this project. There are so many details and elements to coordinate yet your drawings and specs were very well coordinated.”
