

JORDAN FORD

Live Oak, Texas

PROJECT INFORMATION

PROJECT TYPE

Commercial, Renovation

EFFECTIVE AREA

46,000 Sq. Ft.

CONSTRUCTION COSTS

\$1 Million

COMPLETION DATE

August, 2015

OWNER

Jordan Ford

ARCHITECT OF RECORD

Acuform Architecture

CONTRACTOR

Goodwin+Green, LLC

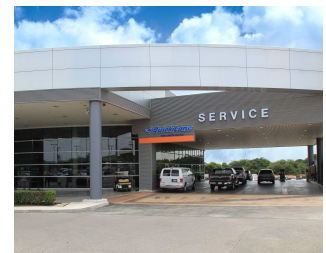

EXPERTISE

Conditions Assessment
Image Program
Extensive Code Analysis
Design-Build
Contract Administration

PROJECT DESCRIPTION

After assisting the owner with the original construction efforts in 2007, Acuform was engaged to provide professional design services for a complete building remodel. The new design simplifies the overall elevation, incorporating more contemporary building finishes. Accent colors help define different building functions and also serve to direct patrons to the right area.

We amended the elevation and stretched the new cladding to better match the horizontal proportions, as well as to utilize existing columns rather than spending additional money to have them removed. The resulting plan offers a much more contemporary appearance and aims to improve the overall customer experience.

“ We were confident that you had our best interest at heart and you all were working hard to make sure we were completely satisfied throughout the entire design and build process.

- Marc Cross, President ”
