Scuba Smiles

ARCHITECT OF RECORD

Acuform Architecture

GENERAL CONTRACTOR

Drash Contracting

EXPERTISE

Image Program
Interior Design
Equipment Coordination

PROJECT DESCRIPTION

Following the completion of the shell building for Advanced Smile Care, Acuform was hired to provide interior design services for their new pediatric dental office. The owners sought to create a premium, one-of-a-kind environment that would resonate with the local community and appeal to families in the area.

To bring this vision to life, we collaborated closely with Imagination Dental Solutions, a leading provider of themed environments, to select and strategically place key 3D artistic elements throughout the office. Acuform carefully curated materials, colors, and mural locations to enhance the immersive underwater theme, creating a playful yet calming space tailored specifically for children.

Our team maintained active involvement throughout construction to ensure that every design detail was executed flawlessly, delivering a vibrant and engaging environment where young patients feel comfortable and inspired.

“Through careful planning and attention to detail, Acuform developed a fanciful underwater themed pediatric dental office. The resulting space is fun and inviting while also stimulating the young minds of the facilities patients.”
